4.1 **National Institute of Standards and Technology Recovery Act Measurement Science and Engineering Fellowship Program Grant**

Brief Description:

Recovery Act Measurement Science and Engineering Fellowship Program: The U.S. Department of Commerce, National Institute of Standards and Technology, announces the availability of up to \$20 million to award from one to five cooperative agreements for a fellowship program(s) to bring scientists and engineers at all stages of their careers to participate in research training or collaboration at NIST programs in Gaithersburg, Maryland, Boulder, Colorado and Charleston, SC. The recipient(s) will work jointly with NIST to identify candidates for fellowships. NIST will collaborate with the recipient(s) to select Fellows for particular research opportunities based on criteria developed in cooperation with the recipient(s). The recipient(s) will provide all stipends, benefits, administrative support, and other expenses associated with the fellowships using the funds from the cooperative agreements.

4.2 **EDA Recovery Act Funding**

Brief Description:

Under this federal funding opportunity (FFO) announcement, EDA is soliciting applications for the EDA American Recovery Program under the auspices of PWEDA. Specifically, the FFO pertains to applications for funding under EDA's Public Works and Economic Adjustment Assistance programs only. Under this FFO, EDA will give priority consideration to those applications that will significantly benefit regions "that have experienced sudden and severe economic dislocation and job loss due to corporate restructuring," as stipulated under the Recovery Act. EDA provides financial assistance to distressed communities in both urban and rural

regions. Such distress may exist in a variety of forms, including high levels of unemployment, low income levels, large concentrations of low-income families, significant declines in per capita income, large numbers (or high rates) of business failures, sudden major layoffs or plant closures, trade impacts, military base closures, natural or other major disasters, depletion of natural resources, reduced tax bases, or substantial loss of population because of the lack of employment opportunities. EDA's experience has shown that regional economic development to help alleviate these conditions is effected primarily through investments and decisions made by the private sector. Under the EDA American Recovery Program, EDA will help restore, replace and expand economic activity in regions that have experienced sudden and severe economic dislocation and job loss due to corporate restructuring, and prioritize projects that will diversify the economic base and lead to a stronger, more globally competitive and resilient regional economy. EDA's economic development activities help create jobs by encouraging business inception and growth.

## 5. DOD – U.S. Department of Defense

**5.1 No grants currently available through grants.gov through grants.gov**

## 6. DOE – U.S. Department of Energy

**6.1 Recovery Act: Energy Efficiency and Conservation Block Grants: Competitive Solicitation: Retrofit Ramp-up and General Innovation Fund Programs**

Brief Description

RECOVERY ACT: This funding opportunity announcement (FOA) is seeking innovative state, local government and Indian tribe programs funded under the Recovery Act. This FOA will use up to \$453.72 million in Recovery Act Energy Efficiency and Conservation Block Grant (EECBG) funds for competitive grants awarded in two (2) topic areas. Topic 1, the Retrofit Ramp-up Program, provides up to \$390.04 million for programs of \$5 to \$75 million for 8 to 20 awards. Topic 2, The General Innovation Fund, is for competitive grants that are reserved for units of local government and state-recognized tribes not eligible for direct formula grants, as per the Energy Independence and Security Act of 2007 requirements. Topic 2 provides up to \$63.68 million (approximately 2 percent of \$3.2 billion) for projects of \$1 to \$5 million for 15 to 60 awards. The goal of this competitive FOA is to stimulate activities that move beyond traditional public awareness campaigns, program maintenance, demonstration projects, and other one-time strategies and projects. DOE seeks to stimulate activities and investments which can:- Fundamentally and permanently transform energy markets in a way that make energy efficiency and renewable energy the options of first choice; and- Sustain themselves beyond the grant monies and the grant period by designing a viable strategy for program sustainability into the

overall program plan. In this FOA, DOE is seeking applications which:- Leverage the participation and support of multiple local jurisdictions, regional planning agencies, and state energy offices;- Prioritize energy efficiency and/or energy conservation as first in the loading order before investments are made in new generation; however, DOE is interested in applications that integrate cost-effective renewables with efficiency.- Move beyond the planning stage and ready for implementation;- Clearly articulate and demonstrate the ability to achieve measurable stretch goals and that have the potential to make an impact at the regional or national level; and- Maximize the creation and/or retention of jobs in the United States.

## **6.2 Recovery Act - Workforce Training For The Electric Power Sector**

Brief Description

- Expected Number of Awards: 45
- Estimated Total Program Funding: \$100,000,000

Workforce Training for the Electric Power Sector Two Topic Areas of Interest: Topic A is Developing and Enhancing Workforce Training Programs for the Electric Power Sector. Topic B is Smart Grid Workforce Training. The objective of this Funding Opportunity Announcement is to facilitate the development of a well-trained, highly skilled electric power sector workforce which is vital to implementing a national clean-energy smart grid. This FOA supports the development and deployment of Training Program(s), as well as the actual training of personnel.

#### **7.5 Recovery Act - BLM-UT Recreation Youth Conservation Corps Project's Modification 2**

Brief Description:

- Expected Number of Awards: 12
- Estimated Total Program Funding: \$2,125,000

Utah BLM's recreation program has ARRA funding available to work with youth conservation corps for the purposes of preserving and creating jobs and promoting economic recovery; assisting those most impacted by the recession; providing investments needed to increase economic efficiency by spurring technological advances in science and; investing in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits. BLM is interested in working with conservation corps to complete conservation projects that enhance the student's classroom learning by providing them opportunities to gain

experience, learn about public lands, further their understanding and appreciation of natural and cultural resources, and pique their interest in natural resource careers.

## **7.12 RECOVERY ACT - Northwest Alaska Inter-village Trails Marking and Mapping, Alaska Modification 3**

Brief Description:

- Expected Number of Awards: 1
- Estimated Total Program Funding: \$300,000

This project will enhance public safety through marking remote winter trails used for inter-village travel across BLM-managed Public lands and adjacent Federal, State, and private lands. It will help reduce unauthorized use on Native Corporation lands adjacent to BLM-managed lands by marking Alaska Native Claim Settlement Act (ANCSA) 17(b) easements, which are the legal access across those lands to reach public lands. It will acquire geospatial data that will help improve land use planning by Federal, State, and Local agencies and enhance search and rescue capabilities in Northwest Alaska.

### **7.13 The National Map: Imagery and Elevation Maps under ARRA Grant**

Brief Description:

- Expected Number of Awards: 15
- Estimated Total Program Funding: \$8,775,000

The USGS seeks to award American Recovery and Reinvestment Act of 2009 assistance funds for the collection and processing of high resolution elevation data and orthoimagery. Many organizations including state and local governments, private and non-profit firms, as well as many Federal government agencies use these data to support their applications and requirements planning, infrastructure improvements, resource assessments and scientific studies. The data collected under this announcement will become available to the public through The National Map. Priorities for the program include collecting elevation data over those coastal areas of United States most susceptible to storm and hurricane flooding, earthquake damage, and coastal erosion and also increasing coverage and availability of leaf-off high resolution orthoimagery.

### 7.15 Recovery Act Funds - Environmental Internships Modification 3

#### Brief Description:

- Expected Number of Awards: 40
- Estimated Total Program Funding: \$5,000,000

The United States Fish and Wildlife Service (USFWS) is an environmental Federal Agency with offices throughout the United States. Through on-site activities located at a variety of field stations, including wildlife refuges, fish hatcheries, and ecological services offices, individuals or groups will be introduced to natural resource careers through “hands-on” work with, and training by, natural resource professionals employed by the USFWS. The goal is to help develop a new generation of enthused and effective conservationists and ecologists. Each selected individual or group is given the opportunity to serve a seasonal on-site assignment, usually scheduled between June 1st and September 30th. During the assignments, individuals or groups are introduced to various real-world conservation and rehabilitation activities such as invasive species management, habitat restoration, wildlife management, and public education and interpretation, mixed with informal and formal training sessions directed by USFWS. The USFWS hereby invites submission of proposals from all potential sources willing and able to cooperatively administer a program for identifying and recruiting individuals or groups for assignments at various USFWS stations.

## 10. DOT - U.S. Department of Transportation

**10.1 Recovery Act - American Recovery and Reinvestment Act (ARRA): Tribal Transit Program Grant**

Brief Description:

- Estimated Total Program Funding: \$17,000,000

FTA will be accepting discretionary applications for funds made available under the “American Recovery and Reinvestment Act, 2009” (Pub. L. 111-5; “ARRA”) to the Public Transportation on Indian Reservations Program (Tribal Transit Program). The ARRA was signed into law by President Barack Obama on February 17, 2009. Goals of the statute include the preservation and creation of jobs and promotion of an economic recovery, as well as the investment in transportation, environmental protection, and other infrastructure providing long-term economic benefits. The ARRA, Tribal Transit program purpose is to provide funding to federally recognized Indian Tribes for public transportation capital projects for use in public transportation. Under ARRA, \$17 million is available for discretionary award.

**10.3 TIGER Grants for Surface Transportation**

Brief Description:

- Estimated Total Program Funding: \$1,500,000,000

Under this program, \$1,500,000,000 is available through September 30, 2011, for the Department to make grants on a competitive basis for projects that will have a significant impact on the Nation, a metropolitan area, or a region. Projects eligible for funding provided under this program include, but are not limited to, highway or bridge projects eligible under title 23, United States Code, including interstate rehabilitation, improvements to the rural collector road system, the reconstruction of overpasses and interchanges, bridge replacements, seismic retrofit projects for bridges, and road realignments; public transportation projects eligible under chapter 53 of title 49, United States Code, including investments in projects participating in the New Starts or Small Starts programs that will expedite the completion of those projects and their entry into revenue service; passenger and freight rail transportation projects; and port infrastructure investments, including projects that connect ports to other modes of transportation and improve the efficiency of freight movement.

## **11.3 Statewide Longitudinal Data Systems - Recovery Act (ARRA) CFDA 84.384A Modification 3**

### Brief Description:

- Estimated Total Program Funding: \$245,000,000

Please review the official application notice for pre-application and application requirements, application submission information, performance measures, priorities and program contact information. Purpose of Program: These supplemental funds, appropriated under the American Recovery and Reinvestment Act of 2009 (ARRA), are intended to help stimulate the American economy. The Statewide Longitudinal Data Systems program provides grants to State Education Agencies to enable them to design, develop, and implement statewide, longitudinal data systems to efficiently and accurately manage, analyze, disaggregate and use individual student data. As provided for under ARRA, funding provided under this competition is to be used for Statewide data systems that, in addition to K-12 data, also include postsecondary and workforce information. The purpose of ARRA is (1) To preserve and create jobs and promote economic recovery; (2) To assist those most impacted by the recession; (3) To provide investments needed to increase economic efficiency by spurring technological advances in science and health; (4) To invest in transportation, environmental

protection, and other infrastructure that will provide long-term economic benefits; and (5) To stabilize State and local government budgets, in order to minimize and avoid reductions in essential services and counterproductive state and local tax increases. Award recipients are legally obligated to meet specific reporting requirements established by the Act. Applications for grants under the Statewide Longitudinal Data Systems competition, CFDA Number 84.384A, must be submitted electronically using e-Application, accessible through the Department's e-Grants Web site at: <http://e-grants.ed.gov>. While completing your electronic application, you will be entering data online that will be saved into a database. You may not e-mail an electronic copy of a grant application to us.

**11.4 Office of Innovation and Improvement; Overview Information: Teacher Quality Partnership Grants Program – Recovery Act (ARRA) CFDA (84.405A): Modification 2**

Brief Description

- Expected Number of Awards: 50
- Estimated Total Program Funding: \$100,000,000

These supplemental funds, appropriated under the American Recovery and Reinvestment Act of 2009 (ARRA), are intended to help stimulate the American economy. The Teacher Quality Partnership program seeks to improve the quality of new teachers working in high-need local educational agencies (LEAs) and high-need schools by creating successful and high-quality model Pre-Baccalaureate Teacher Preparation programs and/or Teaching Residency programs for those qualified to begin teaching. Projects may also include a school leadership component to train superintendents, principals, early childhood educator program directors and other school leaders in high-need or rural LEAs. Initiatives to support development of digital education content, to improve the quality of pre-baccalaureate teacher preparation programs, and/or to enhance the quality of pre-service training for prospective teachers are also supported.

**11.5 Office of Elementary and Secondary Education; Overview Information: Impact Aid Discretionary Construction Program – Recovery Act (ARRA) CFDA 84.401 Modification 2**

Brief Description:

- Expected Number of Awards: 40
- Estimated Total Program Funding: \$60,000,000

Grants awarded under the Impact Aid Discretionary Construction Grant Program provide funds for emergency repairs and modernization of school facilities to certain eligible local educational agencies (LEAs) that receive Impact Aid funds. Approved construction activities, include the preparation of drawings and specifications for school facilities; erecting, building, acquiring, altering, remodeling, repairing, or extending school facilities. The final selection criteria for the competitive grants will be announced in the Federal Register notice. The selection criteria that the Department will consider are (in the order they appear in the ARRA):

- The current health and safety risk of a facility to school students and personnel;
- The facility's capacity to support the needs of the current enrollment;
- The facility's capacity to provide a comprehensive educational program that meets current State standards;
- The extent to which projects would use energy-efficient and recyclable materials;
- The use of non-traditional or alternative building methods to expedite construction and maximize cost efficiency;
- The feasibility of completing the project within 24 months; and
- The availability of other resources for the project.

To be eligible for these grants, an LEA must:

1. Be eligible to receive funds under section 8002 (Payments for Federal Property) or 8003 (Basic Support Payments) of the Impact Aid program for fiscal year (FY) 2008; and
2. Have a total taxable assessed value of real property that may be taxed for school purposes of less than \$100 million or have an average assessed value of real property per pupil that may be taxed for school purposes that is less than the State average.

## **11.7 Office of Elementary & Secondary Education; Overview Information: Teacher Incentive Fund Program- Recovery Act (ARRA) CFDA 84.385 Modification 2**

Brief Description:

- Expected Number of Awards: 15
- Estimated Total Program Funding: \$200,000,000

The purpose of the Teacher Incentive Fund is to support programs that develop and implement performance-based teacher and principal compensation systems, based primarily on increases in student achievement, in high-need schools. The goals of the Teacher Incentive Fund program include:

- Improving student achievement by increasing teacher and principal effectiveness;
- Reforming teacher and principal compensation systems so that teachers and principals are rewarded for increases in student achievement;
- Increasing the number of effective teachers teaching poor, minority, and disadvantaged students in hard-to-staff subjects; and
- Creating sustainable performance-based compensation systems.

The purpose of ARRA is (1) To preserve and create jobs and promote economic recovery; (2) To assist those most impacted by the recession; (3) To provide investments needed to increase economic efficiency by spurring technological advances in science and health; (4) To invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits; and (5) To stabilize State and local government budgets, in order to minimize and avoid reductions in essential services and counterproductive state and local tax increases. Award recipients are legally obligated to meet specific reporting requirements established by the Act.

## **11.8 Office of Postsecondary Education; Overview Information: Teacher Quality Partnership Grants Program – Recovery Act (ARRA) CFDA (84.405A)**

Brief Description:

- Expected Number of Awards: 50
- Estimated Total Program Funding: \$100,000,000

These supplemental funds, appropriated under the American Recovery and Reinvestment Act of 2009 (ARRA), are intended to help stimulate the American economy. The Teacher Quality Partnership program seeks to improve the quality of new teachers working in high-need local educational agencies (LEAs) and high-need schools by creating successful and high-quality model Pre-Baccalaureate Teacher Preparation programs and/or Teaching Residency programs for those qualified to begin teaching. Projects may also include a school leadership component to train superintendents, principals, early childhood educator program directors and other school leaders in high-need or rural LEAs. Initiatives to support development of digital education content, to improve the quality of pre-baccalaureate teacher preparation programs, and/or to enhance the quality of pre-service training for prospective teachers are also supported. To provide grants to promote improvements in the quality of new teachers, with the ultimate goal of increasing student achievement in the nation's K-12 classrooms. Partnership grants are designed to promote significant improvements in teacher education by strengthening the vital role of K-12 educators in the design and implementation of effective teacher education programs, and by increasing collaboration among these educators and institutions of higher education, and departments of arts and sciences.

## **11.9 State Incentive “Race-to-the-Top Fund”**

Brief Description:

- Estimated Total Program Funding: \$4,350,000,000

The Race-to-the-Top Fund will help States drive substantial gains in student achievement by supporting States that are: (a) effectively using other ARRA funds; and (b) making significant progress on the following four education reform goals:

- Increase teacher effectiveness and address inequities in the distribution of highly qualified teachers;
- Establish and use a pre-K-through-college-and-career data system to track progress and foster continuous improvement;

- Make progress towards rigorous college- and career-ready standards and high-quality assessments that are valid and reliable for all students, including limited English proficient students and students with disabilities; and
- Provide targeted, intensive support and effective interventions to turn around schools identified for corrective action and restructuring.

As part of the process for making grant awards under this competition, the Department may propose that the two factors be taken into consideration: (1) whether a State is complying with the Stabilization program MOE requirements (unless the Secretary has granted the State an MOE waiver); and (2) whether a State reduced the proportion of total State revenues spent on education and, if so, whether there were any exceptional or uncontrollable circumstances contributing to the year-to-year decreases, the extent of the decline in available financial resources, and any changes in demand for services.

## **15.2 Recovery Act 2009 Limited Competition: Innovative Adaptation and Dissemination of AHRQ Comparative Effectiveness Research Products (iADAPT) (R18): Modification 2**

Brief Description:

- Estimated Total Program Funding: \$29,500,000

This AHRQ Funding Opportunity Announcement (FOA), supported by funds provided to AHRQ under the American Recovery and Reinvestment Act of 2009 (Recovery Act or ARRA), Public Law 111-5, invites Research Demonstration and Dissemination grant (R18) applications from organizations to extend the reach and impact of Comparative Effectiveness Research (CER) Reviews and associated products, particularly Comparative Effectiveness Research Summary Guides (CERSGs) prepared by the John M. Eisenberg Center for Clinical Decisions and Communications Science part of the AHRQ Effective Health Care Program. Summary guides are intended to help bridge the gap between research and practice by translating and disseminating findings on the comparative effectiveness of clinical interventions for three broad audiences patients/consumers, clinicians, and policymakers. Applicants are invited to propose innovative customizations or adaptations (as defined in this FOA under Part II Section I.1 Research Objectives subsection) to the content presentation and/or delivery mechanism(s) of one or more Comparative Effectiveness Research Review Products. Adaptations should aim to increase the impact and effective use of one or more CER Review Products by developing, implementing, and evaluating customizations that target important audiences, stakeholders, systems, or settings; these customizations may be in the adaptation of the original CER Review or Executive Summary contents to a specialized clinical audience of potential users or adaptation of CERSGs to underserved populations of patients/consumers whose interface with medical or Internet sources of information is limited and who may instead use health care information and advice provided through traditional means. For CER Review Products or CERSGs, adaptations may address the presentation of the content and/or the mechanisms by which the contents are delivered or used.

## 15.7 Recovery Act 2009 Limited Competition: Innovative Adaptation and Dissemination of AHRQ Comparative Effectiveness Research Products (iADAPT) (R18) Modification 1

### Brief Description:

- Estimated Total Program Funding: \$29,500,000

*This AHRQ Funding Opportunity Announcement (FOA), supported by funds provided to AHRQ under the American Recovery and Reinvestment Act of 2009 (Recovery Act or ARRA), Public Law 111-5, invites Research Demonstration and Dissemination grant (R18) applications from organizations to extend the reach and impact of Comparative Effectiveness Research (CER) Reviews and associated products, particularly Comparative Effectiveness Research Summary Guides (CERSGs) prepared by the John M. Eisenberg Center for Clinical Decisions and Communications Science part of the AHRQ Effective Health Care Program. (See <http://effectivehealthcare.ahrq.gov/healthInfo.cfm?infotype=sg> and <http://effectivehealthcare.ahrq.gov/healthInfo.cfm?infotype=rr> for information about CERSGs and CER Reviews respectively.) Summary guides are intended to help bridge the gap between research and practice by translating and disseminating findings on the comparative effectiveness of clinical interventions for three broad audiences patients/consumers, clinicians, and policymakers. Applicants are invited to propose innovative customizations or adaptations (as defined in this FOA under Part II Section I.1 Research Objectives subsection) to the content presentation and/or delivery mechanism(s) of one or more Comparative Effectiveness Research Review Products, such as Comparative Effectiveness Reviews, Comparative Effectiveness Review Executive Summaries, or Comparative Effectiveness Research Summary Guides (CERSGs) where additional adaptations or customizations are aimed at increasing their use, implementation, and impact among difficult-to-reach populations, including the elderly, those with limited English proficiency, limited education or insurance coverage, minority or immigrant status, health literacy problems, or other underserved populations who may have limited contact with the health care system or health information. Adaptations should aim to increase the impact and effective use of one or more CER Review Products by developing, implementing, and evaluating customizations that target important audiences, stakeholders, systems, or settings; these customizations may be in the adaptation of the original CER Review or Executive Summary contents to a specialized clinical audience of potential users (such as Formulary or Pharmaceutical and Therapeutics Committees, health care systems with electronic platforms such as electronic medical records (EMRs) that could support clinical decision support) or adaptation of CERSGs (supplemented as deemed necessary with pertinent information found solely in the CER Reviews) to underserved populations of patients/consumers whose interface with medical or Internet sources of information is limited and who may instead use health care information and advice provided through traditional means, such as neighborhood-, community-, or faith-based groups. For CER Review Products or CERSGs, adaptations may address the presentation of the content and/or the mechanisms by which the contents are delivered or used.*

## **15.8 Current Closing Date for Applications American Recovery Reinvestment Act of 2009 Communities Putting Prevention to Work Modification 2**

### Brief Description:

- Expected Number of Awards: 40
- Estimated Total Program Funding: \$373,000,000

CDC's Procurement and Grants Office has published a funding opportunity announcement entitled, "American Recovery and Reinvestment Act of 2009: Communities Putting Prevention to Work". Approximately \$373 million will be available in fiscal year 2009 to fund thirty to forty awards. The purpose of this FOA is to create healthier communities through sustainable, proven, population-based approaches such as broad-based policy, systems, organizational and environmental changes in communities and schools.

## **15.9 Recovery Act Limited Competition: Building Sustainable Community-Linked Infrastructure to Enable Health Science Research (RC4) Modification 2**

### Brief Description:

- Estimated Total Program Funding: \$30,000,000

The NIH has established a new program entitled Building Sustainable Community-Linked Infrastructure to Enable Health Science Research, hereafter called the Community Infrastructure grants program. This NIH Funding Opportunity Announcement (FOA), supported by funds provided to the NIH under the American Recovery and Reinvestment Act of 2009, Public Law 111-5, solicits applications from domestic (United States) institutions/organizations proposing to support the development, expansion, or reconfiguration of infrastructures needed to facilitate collaboration between academic health centers and community-based organizations for health science research. Such collaboration should transform the way in which health science research is conducted in communities, and accelerate the pace, productivity, dissemination, and implementation of health research; applications that build upon extant collaborative infrastructures supported by other Federal agencies are strongly encouraged. Mechanism of Support. This FOA will utilize the RC4 grant mechanism. Funds Available and Anticipated Number of Awards. This initiative is funded under the Recovery Act. NIH has designated up to \$30 million in FY2009-2010 to fund 30 or more grants, contingent upon the submission of a sufficient number of scientifically meritorious applications.

### **15.11 American Recovery and Reinvestment Act of 2009, Health Information Technology Extension Program: Regional Centers Modification 8**

Brief Description:

- Expected Number of Awards: 70
- Estimated Total Program Funding: \$598,000,000

On February 17, 2009, the President signed the American Recovery and Reinvestment Act of 2009 (ARRA). Title XIII of Division A and Title IV of Division B of ARRA, together cited as the Health Information Technology for Economic and Clinical Health Act (HITECH Act), include provisions to promote meaningful use of health information technology to improve the quality and value of American health care. The HITECH Act also established the Office of the National Coordinator for Health Information Technology (ONC) within the U.S. Department of Health and Human Services (HHS) as the principal federal entity responsible for coordinating the effort to implement a nationwide health information technology (health IT) infrastructure that allows for the use and exchange of electronic health information in electronic format. The HITECH Act (Title

IV in Division B of ARRA) authorizes incentive payments for eligible Medicare and Medicaid providers? meaningful use of certified electronic health record (EHR) technology. In 2015, providers are expected to have adopted and be actively utilizing an EHR in compliance with the "meaningful use" definition or they will be subject to financial penalties under Medicare (per Sections 4101(b) and 4102(b) of ARRA). The detailed criteria to qualify for meaningful use incentive payments will be established by the Secretary of HHS (hereafter referred to as the Secretary) through the formal notice-and-comment rulemaking process. For access to the most current publicly available information about meaningful use, please visit the Meaningful Use section of the ONC programmatic website at: <http://healthit.hhs.gov/meaningfuluse>. Providers seeking to meaningfully use EHRs face a variety of challenging tasks. Those tasks include assessing needs, selecting and negotiating with a system vendor or reseller, implementing project management, and instituting workflow changes to improve clinical performance and ultimately, outcomes. Past experience has shown that robust local technical assistance can result in effective implementation of EHRs and quality improvement throughout a defined geographic area. Section 3012 of the Public Health Service Act (PHSA), as amended by ARRA (see Appendix A), authorizes a Health Information Technology Extension Program (Extension Program). By statute, the Extension Program consists of a national Health Information Technology Research Center (HITRC), and Regional Extension Centers (Regional Centers). (For a discussion of the HITRC and its relationship to the Regional Centers, see Appendix B.1.) This funding opportunity announcement seeks applications from qualified entities to serve as Regional Centers within the Extension Program. (For information about additional priority grant programs authorized by the HITECH Act to address critical, short-term prerequisites to achieving the vision of a transformed health system where every American benefits from secure, interoperable EHRs, see Appendix B.2.)

**15.14 NIH Announces the Availability of Recovery Act Funds for Administrative Supplements Providing Summer Research Experiences for Students and Science Educators**

Brief Description:

The National Institutes of Health (NIH) announces the opportunity for investigators and United States institutions/organizations with active NIH Research Grants to request administrative supplements for the purpose of promoting job creation, economic development, and accelerating the pace and achievement of scientific research. These supplements will also encourage students to seriously pursue research careers in the health related sciences, as well as provide elementary, middle school, and high school teachers, community college faculty, and faculty from non-research intensive institutions with short term research experiences in NIH-funded laboratories. Support for these supplements will come from funds provided to NIH through the American Recovery and Reinvestment Act of 2009 ("Recovery Act" or "ARRA"), Public Law 111-5. In

addition, Recovery Act funds allocated to NIH specifically for comparative effectiveness research (CER) may be available to support supplements. Projects receiving these funds will need to meet this definition of CER: “a rigorous evaluation of the impact of different options that are available for treating a given medical condition for a particular set of patients. Such a study may compare similar treatments, such as competing drugs, or it may analyze very different approaches, such as surgery and drug therapy.” Such research may include the development and use of clinical registries, clinical data networks, and other forms of electronic health data that can be used to generate or obtain outcomes data as they apply to CER. This announcement is one of three ARRA administrative supplement/competitive revision notices issued by NIH. Approximately \$1 billion of ARRA funds will be obligated by September 30, 2010 to support requests submitted in response to these three notices or any reissuance of these notices. This administrative supplement solicitation encourages submissions in all scientific and programmatic areas funded by NIH. Support may be requested for up to 2 years for qualified grants (see eligibility section in the full announcement).

## 16. HUD – U.S. Department of Housing and Urban Development

### 16.1 Assisted Housing Stability and Energy and Green Retrofit

Brief Description:

- Estimated Total Program Funding: \$250,000,000

Grants and loans will be made available through HUD’s Office of Affordable Housing Preservation (OAHP) for eligible property owners to make energy and green retrofit investments in the property, to ensure the maintenance and preservation of the property, the continued operation and maintenance of energy efficiency technologies, and the timely expenditure of funds. Physical and financial analyses of the properties will be conducted to determine the size of each grant and loan. Incentives will be made available to participating owners. The terms of the grants or loans will include continued affordability agreements. Grant and loan funds must be spent by the receiving property owner within two years. Full detail of how to apply, and grant and loan terms, will be published in a Housing Notice within 60 days of the Recovery Act being signed into law.

**18.1 No grants currently available through grants.gov**

## 19. NASA - National Aeronautics and Space Administration

**19.1 NEW 09: B.2 Aircraft Aging and Durability Project (AAD1)(Recovery Act) odification 1**

Brief Description:

- Expected Number of Awards: 5
- Estimated Total Program Funding: TBD

The Aging Aircraft and Durability (AAD) Project is part of the NASA Aviation Safety Program. The goal of the AAD Project is to perform foundational research in aging science that will ultimately enable system-level integrated methods for the detection, prediction and mitigation/management of aging-related hazards for future civilian and military aircraft. The Project is organized relative to these three theme areas: • Detect – locate and characterize fully damage or degradation of materials and structures • Predict – life and strength predictions accounting for accumulated damage associated with long-term exposure to thermal/mechanical/environmental loads • Mitigate – concepts to prevent, contain, or manage degradation associated with aging B-4 The focus of AAD is on aging and damage processes in new aircraft designs and 'young' aircraft, rather than life extension of legacy vehicles. There is an emphasis on new and emerging material systems/fabrication techniques and the potential hazards associated with aging-related degradation.

**19.2 NEW 2009: B.6 Verification and Validation of Flight Critical Systems (VVFCS1)  
(Recovery Act)**

Brief Description:

- Expected Number of Awards: 10
- Estimated Total Program Funding: TBD

The goal of the Verification and Validation of Flight-Critical Systems (VVFCS) project is to develop multidisciplinary verification and validation tools and techniques that advance safety assurance and certification of complex, networked, distributed flight critical systems. Here flight critical systems are defined to be any system that directly controls the safe conduct of an aircraft's flight. This includes air and ground systems, concepts of operation as well as technology, and recognizes that human performance is a key factor in flight-critical systems and must be accounted for. The increasing complexity of flight critical systems proposed for the Next Generation Air Transportation System (NextGen) will require new paradigms and real-time distributed system infrastructures providing high levels of confidence and safety assurances. The cost of proving a flight-critical system is safe is often expected to far surpass the costs for other aspects of design and implementation.

### **19.3 ROA 2009: A.4 Supersonics Project (SUP1) (Recovery Act) Modification 3**

#### Brief Description

The Supersonics Project is aligned with the ARMD principles of maintaining intellectual stewardship of aeronautical core competencies for the nation in the supersonic flight regime and of focusing research in areas that are appropriate to NASA's unique capabilities. The Project supports the Fundamental Aeronautics Program strategy of developing systems level multidisciplinary capabilities for supersonic civilian and military applications. The Supersonics Project is a broad-based effort designed to develop knowledge, capabilities and technologies that support vehicles that fly in the supersonic speed regime with a focus on eliminating the efficiency, environmental and performance barriers to practical supersonic cruise vehicles. The Project has identified a set of key Technical Challenges that are barriers to success for this vehicle type. These are: Efficiency Challenges Supersonic Cruise Efficiency Light Weight, Durable Airframes and Engines for Supersonic Cruise Temperatures • Environmental Challenges Airport Noise Reduction Sonic Boom Modeling High Altitude Emissions Reduction • Performance Challenges Aero-Propulso-Servo-Elastic (APSE) Analysis and Design • Multidisciplinary Design, Analysis and Optimization Challenges (Understanding and exploiting the interactions of all these supersonic technology challenges is the key to the creation of practical design.) Systems Integration, Assessment and Validation • Flight Research & Validation Flight Validation and Test Technique Development In this solicitation, the Supersonics project is seeking proposals in the Sonic Boom Modeling Technical Challenge to further investigate Auralization of Sonic Booms Transmitted into Buildings, Community Response to Low-amplitude Sonic Booms, and Sonic Boom Focusing. For a more detailed overview of the Supersonics project efforts, please refer to:

[http://www.aeronautics.nasa.gov/nra\\_ref\\_docs.htm](http://www.aeronautics.nasa.gov/nra_ref_docs.htm) For a more detailed description of the current Supersonics Project tasks and associated milestones that are relevant to this NRA solicitation please refer to the

following documents under the “Other Documents” section of NSPIRES for this solicitation: • Sonic Boom Modeling Task Plan

## **19.4 ROA 2009: C.4 NextGen-Airspace Project (AS2R) (Recovery Act) Grant**

### Brief Description

The NextGen Airspace Project develops and explores fundamental concepts and integrated solutions that address the optimal allocation of ground and air automation technologies necessary for next generation air transportation system (NextGen). The Project will focus NASA’s technical expertise and world-class facilities to address the question of where, when, how and the extent to which automation can be applied to moving aircraft safely and efficiently through the National Airspace System (NAS). Research in this Project will address 4D Trajectory Operations, including advances in the C-34 science and applications of multi-aircraft trajectory optimization that solves the demand/capacity imbalance problem while taking into account weather information and forecast uncertainties and while keeping aircraft safely separated. The Project’s research will develop and test concepts for advanced traffic flow management to provide trajectory planning and execution across the spectrum of time horizons from “strategic planning” to “separation assurance.” Ultimately, the roles and responsibilities of humans and automation influence every technical area and will be addressed. The NextGen Airspace Project team has developed a plan that will integrate solutions for a safe, efficient and high-capacity airspace system through joint research efforts and partnerships with other government agencies. In addition to core research and development to be conducted by NASA, Space Act Agreements will be established with U.S. industry to address research partnerships at the system-wide level including systems integration and operational applications. The Project will utilize this NASA Research Announcement (NRA) to leverage in-house foundational research with academic institutions, non-profit organizations and industry performing foundational research to address technology gaps. This current solicitation seeks proposals related to the following NextGen Airspace Project research focus areas: System-Level Design, Analysis, and Simulation Tools (SLDAST). SLDAST will develop system design and analysis tools to assess the functional/temporal distribution of authority and responsibility among/between automation and humans. Solicitations for other research focus areas will be posted in future announcements. Milestone references for Subtopics in this section of the NRA are provided below under the heading “Milestones Supported” so that it is possible to see how the NRA topics fit into the NASA Aeronautics research plan. These milestones are listed on project roadmaps that are available on the ARMD website ([www.aeronautics.nasa.gov](http://www.aeronautics.nasa.gov), under the Programs link).

## **19.5 ROA 2009: C.3 NextGen-Airportal Project (AP1R) (Recovery Act) Grant**

### Brief Description

The NextGen-Airportal Project works in close collaboration with the NextGen- Airspace Project to conduct airspace and Airportal foundational research and discipline-based technology development for the nation. The Project focuses NASA's technical expertise and world-class facilities to enable the highest possible efficiency in the use of gates, taxiways, runways, metroplex airspace, and other Airportal resources. In pursuit of that goal, the project is researching, developing, demonstrating, and validating operational concepts, proof-of-concept systems, algorithms, technologies, tools, and operational procedures designed to maximize capacity and throughput in the Airportal environment while enabling associated elements of the Next Generation Air Transportation System (NextGen) as defined by the Joint Planning and Development Office (JPDO). Project performance objectives seek to use 4-D trajectories (aircraft path from "block-to-block," including the path along the ground) to plan and execute system-wide operations; integrate 4-D trajectory operations with safe, optimized surface and terminal area traffic operations (particularly those associated with C-14 wake hazard prediction and avoidance); balance environmental issues in, and around, airports; match surface and airside capacities with arrival and departure air traffic flow; and assess local benefits of Airportal transformation by modeling changes to the current airport configuration. In support of these objectives, research activities will focus on:

- Optimization of surface traffic
- Dynamic airport configuration management
- Advanced technologies to detect and avoid wake vortex hazards
- New procedures for performing safe, closely spaced and converging approaches at closer distances than are currently allowed
- Modeling, simulation, and experimental validation focused on efficient operations of single and multiple regional airports (metroplex)

NextGen-Airportal Project research focus areas (RFAs) are the following: Safe and Efficient Surface Operations (SESO), Coordinated Arrival and Departure Operations Management (CADOM), and Airportal and Metroplex Integration (AMI). SESO conducts research to manage traffic on the airport surface (gates, taxiways, and runways) safely and efficiently to enable maximum throughput and capacity in the airport environment. CADOM focuses on concepts and technologies needed to mitigate operational constraints to maximizing single and multiple airport capacity. AMI focuses on management of metroplex operations, integration of work across the Project's technical areas, and crosscutting research (e.g., human/system integration and concept analyses for portfolio management). The NextGen-Airportal Project team has developed a plan that will enable capacity and efficiency improvements in the airportal domain through joint research efforts and partnerships with other government agencies. In addition to conducting core research and development, NASA will establish Space Act Agreements with U.S. industry to address research partnerships at the systemwide level, including systems integration and operational applications. The Project will utilize this NASA Research Announcement (NRA) to leverage inhouse foundational research with academic institutions, non-profit organizations and industry performing foundational research to address technology gaps.

**19.6 National Aeronautics and Space Administration NASA Headquarters ROA 2009: A.4  
Supersonics Project (SUP1) (Recovery Act)**

Brief Description

The Supersonics Project is aligned with the ARMD principles of maintaining intellectual stewardship of aeronautical core competencies for the nation in the supersonic flight regime and of focusing research in areas that are appropriate to NASA's unique capabilities. The Project supports the Fundamental Aeronautics Program strategy of developing systems level multidisciplinary capabilities for supersonic civilian and military applications. The Supersonics Project is a broad-based effort designed to develop knowledge, capabilities and technologies that support vehicles that fly in the supersonic speed regime with a focus on eliminating the efficiency, environmental and performance barriers to practical supersonic cruise vehicles. The Project has identified a set of key Technical Challenges that are barriers to success for this vehicle type. These are: Efficiency Challenges Supersonic Cruise Efficiency Light Weight, Durable Airframes and Engines for Supersonic Cruise Temperatures • Environmental Challenges Airport Noise Reduction Sonic Boom Modeling High Altitude Emissions Reduction • Performance Challenges Aero-Propulso-Servo-Elastic (APSE) Analysis and Design • Multidisciplinary Design, Analysis and Optimization Challenges (Understanding and exploiting the interactions of all these supersonic technology challenges is the key to the creation of practical design.) Systems Integration, Assessment and Validation • Flight Research & Validation Flight Validation and Test Technique Development In this solicitation, the Supersonics project is seeking proposals in the Sonic Boom Modeling Technical Challenge to further investigate Auralization of Sonic Booms Transmitted into Buildings, Community Response to Low-amplitude Sonic Booms, and Sonic Boom Focusing.

**29.1 Recovery Act - 2008 Aquaculture Grant Program**

### Brief Description:

- Estimated Total Program Funding: \$50,000,000

U.S. Department of Agriculture (USDA), Commodity Credit Corporation (CCC) is announcing the availability of funding under the American Recovery and Reinvestment Act of 2009 (Recovery Act). The Recovery Act authorizes \$50 million of CCC funds for grants to States that agree to provide assistance to eligible aquaculture producers for losses associated with high feed input costs during the 2008 calendar year. Under a forthcoming federal funding opportunity (FFO) announcement, the Recovery Act – 2008 Aquaculture Grant Program will

solicit applications for grant funding. CCC will not accept applications until the FFO is published. The FFO will be posted on [www.grants.gov](http://www.grants.gov) as soon as it is available. Eligible applicants are limited to State Departments of Agriculture or similar state government entities in each State. Under the forthcoming FFO, grants to States will be made on a pro rata basis based on the amount of aquaculture feed used in each State during the 2007 calendar year, as determined by CCC. Subject to the availability of funding, CCC anticipates awarding \$50 million to States by July 2009. For additional information on the Recovery Act – 2008 Aquaculture Grant Program, please visit the USDA Recovery Act web site at [www.usda.gov/recovery](http://www.usda.gov/recovery) This synopsis will be modified when the full announcement is posted.
